Designing Tiger products is a global affair that starts with our Italian designers and finishes with Korean dedication to quality.

Tiger is a leading manufacturer of high quality buffet ware and multi-purpose trolleys headquartered in S. Korea with production sites both in Seoul Korea and Tianjin China.

With the new 20,000 sqm of factory and show room in Tianjin, Tiger can bring more innovative and value-added products to you. Our new 20,000 sqm factory will enable us to continue developing new innovations and value through quality.

Tiger believes that the products that we offer to the customers should be:

- technologically advanced,
- elegantly designed,
- competitively priced.

We use the highest quality materials in the market today. We meet or exce-

ed all European and American food safety standards. Tiger welcomes OEM/ODM as well.

The company motto is "no compromise in quality". Best hoteliers value our quality (complete reference list on www.tigerhotel.co.kr).

Tiger made history in the early 1980s when Mr. M. Y. Chang, Chairman of Tiger, founded Daijin Enterprise to manufacture service trolleys in a small workshop in South Korea. As a young man, he saw the growing opportunity in hospitality industry in Korea with Seoul Olympics games held in 1988. Daijin's modern service trolleys were quickly sought after restaurants and hotels.

Growing from this heritage, Tiger was founded in 1996 and began to export. The synergy of old world craftsmanship from its Mother Company and in-

novation made Tiger to become an industry leader in just a few short years. Tiger built a factory in Tianjin China in order to explore the growing Chinese market and to mass-produce products in 2001 and in 10 years it was expanded to 20,000 sqm of factory, warehouse, show room and office.

To ensure that quality is maintained, Mr. Chang-chairman, appointed his son to oversee the manufacturing. With the opening of a design centre in Italy in 2005, making Tiger products became a truly global affair. Italian designers work with Korean engineers and the projects are realized as products in the newest and modern Chinese production.

Tiger's vision for the future is to bring value through quality in a larger range of table top product to become a reliable partner for the best hotels worldwide.

The soul of stylish vintage combined with old-world charm.

There is something to be said about nostalgia when it comes to vintage trend. Aspiring the trend from another period can be a sort of escape or consolation from contemporary stresses for the people of twenty-first century.

That vintage style keeps 1920s fashions at its core because in many respects, 1920s American society represents the good old days of prosperity. It was a decade of indulgence, rapid economic growth.

The Artisan, premium aluminum casting chafer. The comfort of home served by professionals.

Modular buffet system-Domino

Domino is a completely new concept in modular buffet system. All the Domino components can interlock or stand alone. Simply connect components to build your designed buffet. When tomorrow comes build it again or try something new. Domino is made from food grade 18/10 Stainless steel. Built and design to endure the abuse of a commercial operation. Domino heated components can use caned fuel or electric; domino's easy lock & unlock leg system makes it simple to change height; no tools or complicated instructions; simply insert and twist. The base modules consist of 3 sizes: 25 cm (9.75") square; 35 cm (13.75") square; 62x35 cm (24.25" x 13.75") rectangle. Each base unit is 9 cm (3.50") tall. The unit can simply share legs or the height can be increased by 9 cm (3.50") increments to create beautiful high and low horizon on the buffet scene. To add a leg/height just insert and twist. No tools required. You build it and they will come. **Let your imagination design your Buffet. The system is so simple, a child can do it. Simply put, Domino makes it fun again!**

Induction chafing dishes

The induction chafing dishes from Tiger not only look great, but also are unique in design and effective in cost. This unit can be flush mounted utilizing induction heat, or our electric heater, or canned fuel. The clad bottom distributes heat evenly minimizing hot spots that cause food to stick and burn. The self-closing lid has adjustable patented hinges that will prevent food from getting cold. In addition, the lid can be removed with one hand for easy cleaning. The lid also has air vents that reduce condensation build up that could drip on the food. This condensation is captured by the water recycling system allowing less refilling of the water pan, decreasing labor costs. The handle keeps cool preventing burns. The entire chafer is repairable, making this a quality investment that will last for years to come.

THANKS TO ITS HIGH DENSITY MAGNETIC BOTTOM TIGER CHAFERS ARE THE MOST ENERGY EFFICIENT CHAFERS IN THE MARKET! SAVE ON THE ENERGY COST, CHOOSE TIGER!

2. Dripless Waterpan.

3. Fully functional automatic slow-down system.

Roll top chafing dishes

Oblong Roll Top Chafing Dishes are made of solid 18-10 Stainless steel. The structure is sturdy due to 3 mm gauge frames. The lid opens to 90° and 180° for serving versatility and has an auto-braking system to prevent slamming. The lid will roll back to 90° and stop. To continue to 180° simply push the lid beyond the stop. This will help keep food warm more efficiently.

The water control system will decrease labor by recycling the condensation from the lid to the water pan. In addition, the lid can be removed for easy cleaning.

The handle keeps cool preventing burns.

The chafer is repairable, making this a quality investment that will last for years to come.

Urns and dispensers

The cereal dispenser is designed to dispense many different dry foods such as: Nuts, goldfish, trail mix, candy, yogurt toppings and of course cereal. Simply turn the soft rubber paddle with the handle to dispense. There is a catch tray at the bottom for crumbs. It can be easily assembled and disassembled so its simple to clean and repair. Replacement parts are readily available. This makes it a quality investment that will last for years to come. Made of 18-10 Stainless steel. The Dispenser cylinders are made of polycarbonate. Dishwasher safe. Outstanding scratch resistance and no glazing. Bisphenol A (BPA) Free. Juice Dispenser has a removable stainless steel ice core that fits onto the edge of the acrylic jar. The interior ridge of the acrylic jar flares, making the jar stronger. It has a removable drip tray for easy cleaning. Replacement parts are also available, so the juice dispenser is 100% repairable.

Coffee urns are designed to look great and be simple and easy to clean or service. With our optional electric heater, you can keep the coffee at a perfect temperature without it burning or scorching. It's made out of 18/10 stainless steel & comes with an insulated lid.

SMART W SOUP URNS
